Program Dates and Description

August 2 - 6, 2021

10:00am - Noon

Venue: Online Distance Learning

Instructors: University of Southern California Wrigley Institute for Environmental Studies and Master Marine Science Instructors

Topic: "Journey through the Marine Food Chains"

Students will learn:

- The bottom level of the ocean's food chain is largely invisible. It is made up of billions of one-celled organisms
- The next level of the marine food chain is made up of plant-eaters
- The next level provides food for a large group of small animals, such as sardines
- Large predators such as sharks, tuna, dolphins, pelicans sit at the top, or apex, of the marine food chain.
- How humans and conditions can affect marine food chains.
